August 11, 2011

To Whom It May Concern:

Robins & Morton contracted with The Sack Company to install the complete electrical system for a new 150,000 square foot hospital in Jesup Georgia. The supervision and staff worked very well with Robin & Morton and worked with the owner to make sure the building systems functioned properly to meet all expectations. The Sack Company met their schedule and budget obligations. The Sack Company is on our current bidders list and I would recommend The Sack Company for future work.
